

Use of Consultants for CDMO Selection

In Q22022, ISR asked 99 outsourcers whether the company they work for uses consultants to help guide their CDMO selection process. Two-fifths (**42%**) of respondents confirmed the practice. The use of consultants during CDMO selection is popular at both large biopharma companies with an annual R&D of \$1B+ and non-large companies with an annual R&D <\$1B, (**38%** and **46%**, respectively).
